Vol. VII, No. 3

March 1963

FEBRUARY UNIFORM PRICE \$3.83

Dairy farmers will receive a uniform price of \$3.83 for February 1963 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. The minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge.

PRODUCER RECEIPTS

The daily average of producer receipts was down slightly from January and was off about 2 percent from a year ago. These small decreases are not the result of less milk per farm, but less farmers on the market. There has been a decrease of 43 producers since February of 1962, and yet these producers that are still on, are producing 34 pounds more per day than a year ago. It is thought that producer receipts might be running ahead of last year, if we had not had such a severe winter.

CLASS I SALES

Sales of Class I products have decreased about 2½ percent from a year ago. The main decrease is in whole milk; the by products have stayed about the same, or increased a small amount, and heavy cream products have dropped, and cereal cream increased. The average test of Class I products for February 1963 was 3.6825% as compared to 3.6894% for February 1962.

BULK TANKS

This market will have only one handler receiving can milk after March 1, 1963. Bulk tank premiums are being eliminated, since most of the milk is now bulk tank, so the incentive for change-over has disappeared.

CLASS I PRICE

The Class I price for the March 1963 delivery period will be \$3.90 per hundredweight for 3.5 percent milk. This price was computed by adding \$0.90 per hundredweight to the basic formula price (\$3.10), minus the 10 cent supply-demand adjustment. The supply-demand adjustment for the April 1963 delivery period will be a minus 8 cents.
